We always want to keep you informed
Items you need to bring with you for your first visit:

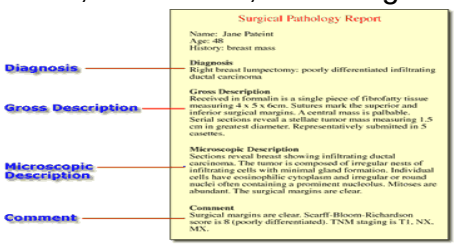

<u>Government issued photo ID</u> will be used upon your visit to complete your registration into our system.

<u>Insurance card</u> will be used to validate the information given to us.

Any outside reports (pathology, CT scan, Bone scan, mammogram, etc.)

We welcome your questions (any questions you might want to ask your doctor or nurse while you are being seen)

Prior to your appointment, a member of our team will contact you to confirm your visit and review any information or materials you may need to bring. We recommend keeping our phone number handy on the day of your appointment. If you have difficulty locating our office or are running late, please call us and we will be happy to assist you. When you arrive, you will be asked to complete any necessary registration paperwork. After check-in, there may be a brief wait before a nurse escorts you to an exam room to meet with your physician. Your care team will explain what to expect throughout your consultation and answer any questions you may have. We encourage patients to bring a family member, friend, or caregiver for support. If you would like a loved one to be involved in discussions about your care, they are welcome to accompany you during your visit.

Our goal is to keep you and your family informed, supported, and comfortable throughout your care experience. If there is anything we can do to make your visit easier, please let us know. We are here to help.
